ABOUT ME

I'm interested in building web applications which enable journalists, artists, and non-profits to share important information, visuals, and data with their users that is accessible, performant and easy to consume across all platforms.

EXPERIENCE

Alley Interactive

UX Developer, Dec 2014 – June 2018

Collaborated with a fully-distributed scrum team to build and maintain responsive, accessible, and performant WordPress themes, single-page applications, and interactive website components for enterprise-scale digital publishers, non-profits, entertainment, and museum clients, using modern technologies like SCSS, PostCSS, ES6 JavaScript, webpack, ReactJS, and in-browser prototyping.

Helped author and implement front-end best practices, internal development tools, and documentation, including code linters, standards and style guides, and participated in peer reviews of all production code.

Oomph, Inc., Boston, MA

Front-End Developer, July 2012 – Feb 2014

Worked solo or coordinated with a small team of developers at a WordPress VIP partner. Created themes, interactive modules, and other front-end styles and components for WordPress and Drupal client sites.

eMagine Communications, Taunton, MA

Website Maintenance, March 2010 – March 2012

Responsible for servicing client requests for website updates and custom enhancements, as well as providing support for Joomla, WordPress and our proprietary .NET CMS platforms. Client projects included custom template and layout designs and development, as well as analytics & CRM integration, content implementation, designing & deploying email campaigns, interactive site components, and mobile site development.

Rhode Island College Graphics, Providence, RI

Graphics Supervisor, May 2009 – Jan 2010
Student Graphics Designer, March 2008 – May 2009

Provided design, advertising and marketing services for students and organizations on campus, specializing in large format print services, logo, flyer, pamphlet, and apparel design, as well as social media and online marketing design and consulting.

As supervisor, helped streamline organization, established a formal project workflow, expanded digital services, and enhanced production quality.

EDUCATION

Rhode Island College, Providence, RI

Graphic Communications, Jan 2008 – Jan 2010

Pursued a BA in Graphic Communications. Coursework included graphic design work, preparing prepress layouts & graphics, web development, current trends, and communications theory.
